

Full Cast Gold Crowns

GOLD is Simple... It's Predictable and ...It's **BEAUTIFUL!** It is kind to opposing dentition and bio-compatible with soft tissue which eliminates sensitivity and allergic reaction.

GOLD expands and contracts at the same rate as natural teeth and it resists plaque build-up for good dental health. There is minimal micro-leakage to prevent recurrent caries and there is documented durability and longevity.

GOLD is an old standard and many in the dental profession are returning to those standards. Take a step back in time to the old standards and make your next restoration a **Full Cast Gold Crown!**
